DETAILED ACTION

Allowable Subject Matter

Claims 1 – 25 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-21, There is no prior art of record that teaches a display panel using a hologram pattern liquid crystal comprising: first and second data lines formed in the same direction, the second data lines formed in a direction perpendicular to the first and second data lines, the second data lines overlapping with upper parts of the first scanning lines so that the first and second scanning lines are offset and first and second scanning lines formed in line in a direction perpendicular to the first and second data lines, the second scanning lines overlapping with upper parts of the first scanning lines so that that the first and second scanning lines are offset; liquid crystals having hologram patterns formed between the first scanning lines and the first data lines, and liquid crystal having hologram patterns formed between the first scanning lines and the first data lines.

Regarding claims 22-25, there is no prior art of record that teaches a display panel comprising: first and second data lines formed in a first direction; first and second scanning lines formed in a second direction and liquid crystal having hologram patterns which are formed between the first and second scanning lines and first and second data lines between the second scanning lines respectively, wherein at least one of the second data lines partially cover the first data lines or at least one of the second scanning lines partially cover the first scanning lines. For the record the term partial is

interpreted as "of relating to, being or affecting only a part; not total; incomplete" as defined by the American Heritage College Dictionary 4th edition such that the limitation excludes complete coverage.

Yamanaka et. al US 5986729 discloses display with first and second signal and scanning lines however all the driving elements for each liquid crystal layer are found on the lower substrate.

Cutler et al US 5457551 discloses a display with multiple liquid crystal layer with driving lines found on each substrate however Cutler does not teach any kind of offset between first and second scanning lines (see figure 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
